

Now available:

11 BULK PROTEASES

developed and produced by  **GENENCOR**
A Danisco Division

A very complete set of proteases,
ideal for preparing and modifying:

- chiral chemicals
- peptides
- proteins

...in an easy-to-use...

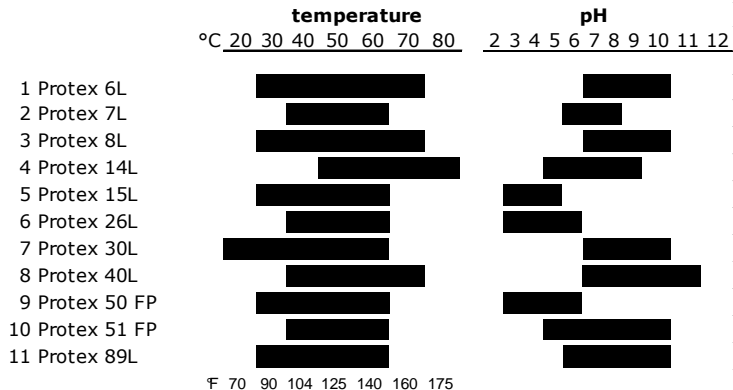

SCREENING KIT

packed and distributed by  **Chiral Vision**

www.chiralvision.com

optimal enzyme conditions

"Resolutions with Protex yields up to 100% e.e. for many amino acid derivatives."

The kit contains 20 ml or 5 gram of each enzyme and is available exclusively via ChiralVision. All proteases are also available separately in research quantities and readily in ton-scale bulk. Go to www.chiralvision.com for more info, pricing and ordering.

Genencor is a leading industrial biotechnology company that develops, produces and markets innovative enzymes and biobased products with unique functionalities.

ChiralVision is specialized in immobilized enzymes, chiral chemicals and enzymatic process development for the production of chiral intermediates and APIs.

Immobilized proteases

ChiralVision offers also covalently immobilized formulations of Genencor's bulk proteases. Until now this enzyme class was not available immobilized. New applications through the use of carrier bound proteases are made possible:

- easy separation from typical water soluble products
- conversions in organic media
- resolution via transesterification

The immobilization technology allows you to find economical process conditions that gives the desired product quality and productivity.
