# Immobead covalent Kit
# for enzyme immobilization

ChiralVision's Immobead kit contains macroporous carriers specially developed for enzyme immobilization or protein purification. Ideal for experiments in your own laboratory.

- 13 carriers for covalent enzyme immobilization
- 25 gram each

|---|---|
| **Product nr. IMMO-COV** (kit with 13 carriers, 25 g each) | 649 euro / kit* |

** Shipping not included. For ordering information visit the website. Contact us for a US dollar quote.*

| | Product name | Type | Matrix | Functional group | % water | Particle size (µm) |
|---|---|---|---|---|---|---|
| 1 | IB-COV-1 | very hydrophobic | polyacrylic | low epoxide and high butyl | 75 | 150-600 |
| 2 | IB-COV-2 | hydrophilic | polyacrylic | epoxide and low butyl | 75 | 150-710 |
| 3 | IB-COV-4 | very hydrophobic | polyacrylic | low epoxide and octadecyl | 75 | 150-600 |
| 4 | IB-COV-5 | hydrophobic | polyacrylic | epoxide and hexadecyl/octadecyl | 70 | 200-710 |
| 5 | IB-COV-6 | very hydrophilic | polyacrylic | epoxide and hydroxyethyl | 70 | 200-710 |
| 6 | IB-COV-7 | hydrophilic | polyacrylic / DVB | epoxide | 60 | 300-600 |
| 7 | IB-COV-8 | very hydrophilic | polyacrylic | epoxide | 70 | 200-710 |
| 8 | IB-COV-9 | extremely hydrophilic | silica | propyl epoxide | 60 | 300-700 |
| 9 | IB-COV-10 | extremely hydrophilic | cellulose solid | epoxide, anionic | 50 | 20-40 |
| 10 | IB-COV-11 | hydrophilic | polyacrylic | epoxide | 66 | 150-250 |
| 11 | IB-COV-12 | hydrophobic | polyacrylic | epoxide, butyl | 63 | 100-400 |
| 12 | IB-COV-14 | extremely hydrophilic | cellulose solid | long epoxide, anionic | 50 | 20-40 |
| 13 | IB-COV-15 | extremely hydrophilic | cellulose MCC | epoxide, anionic | 50 | 50-200 |
